AHCPR (Agency for Health Care Policy and Research). 1999. National Guideline Clearinghouse, website: <http://www.guidelines.gov>. (This is a compendium of guidelines from numerous government agencies, professional medical societies, and other sources. It theoretically includes all guidelines developed in the U.S. and those with international consensus. The degree to which these are followed is questionable, and there is a considerable literature that discusses the fact that physicians do not follow some guidelines.)
